

The chart displays the proportion of devices running different Android versions from July 2011 to January 2014. The y-axis represents the proportion (0.0 to 1.0), and the x-axis represents the date. The legend on the right lists Android versions 2 through 19, each associated with a specific color. The chart shows a clear trend of newer versions replacing older ones over time. Version 2 (dark blue) is the most prevalent in early 2011, while version 19 (dark red) becomes the most prevalent by early 2014.
