

The heatmap displays the frequency of transitions between software versions. The x-axis (horizontal) and y-axis (vertical) both list versions from 2.1.0 to 5.0.2. A diagonal line from the bottom-left to the top-right indicates no change in version. The area above the diagonal is labeled 'upgrades' and the area below is labeled 'downgrades'. The color intensity represents the frequency of transitions, with a scale from yellow (low) to dark red (high). The most frequent transitions are shown in dark red, including 2.3.3 to 2.3.4, 4.0.3 to 4.0.4, 4.1.1 to 4.1.2, 4.2.2 to 4.3.0, and 4.3.0 to 4.4.0.
